## Staple Gun with Bottom-Load Magazine Crown 1/4"

25AC

SKU: 296    UPC: 758844000000

The 25AC Stapler uses our patented design to drive the specially designed staples to a predetermined depth, thus making it virtually impossible to crush broadband wires, such as Cat5, Cat5e, Cat6, Coax RG6, and Coax RG6-TRI, thereby preserving their high speed data transmission properties. This anti-crush objective is accomplished by the interaction of several of the gun's components with the wire or cable being installed to automatically regulate depth to which each staple is driven. The 25AC is used to install staples over cables up to 1/4" (6mm). Available leg length is 19/32" (15mm).

### Features

- Secure installation of cables up to 1/4" (6mm)
- Available leg length is 19/32" (7mm) for (25AC) and 9/32" (7mm), 3/8" (9mm), 7/16" (11mm) and 9/16" (14mm) for (25A)
- 25AC - nearly impossible to crush broadband wires
- Ergonomic design with a high visibility yellow handle
