AC1200 Wave 2 Gigabit Access Point

W63AP

SKU: 140917    UPC: 885397000000

The IEEE 802.11ac Wave 2-compliant W63AP is a gigabit dual-band ceiling access point. It offers a concurrent data rate as high as of 1167 Mbps. Powered by MU-MIMO technology, a single W63AP can simultaneously communicate with multiple clients, greatly improving the throughput and bettering user experience. The built-in omni-directional antennas optimize signal radiating directions, broadening the wireless coverage of a single AP. W63AP can be powered by PoE sourcing equipment that compliant with IEEE 802.3at. With its ceiling installation design and sleek appearance, it simplifies wireless networking for enterprises, hotels and other public indoor spaces.

#### Features

- Gigabit port
- Up to 1167 Mbps dual-band data rate
- MU-MIMO for high throughput
- Supports to be centrally managed by all IP-COM access controllers (AC) and enterprise routers that includes AC functionality
