

## Hex Head Phillips / Square Wall Twister Kit, 3/16" x 1-1/4"

WTKHX

SKU: 129767

The Wall Twister® is an all steel, single piece screw anchor manufactured with a unique deep cutting thread design, its suitable for fastening objects into drywall, wood, concrete, plaster, brick, and block walls. The patented reverse serrations under the head prevent over-torquing. When working with masonry-based materials, use the 3/16 carbide tipped drill bit included in the kit to create a pilot hole. When fastening into drywall or wood, no pre-drilling is required. Typical applications include HVAC fixtures, signs, telecommunications equipment, plumbing fixtures, and many more.

### Features

- Wall Twister anchor type
- Hex/Phillips/Square drive type
- Hex washer head type
- Helical thread style
- 3/16" pre-drill size
- (100) Hex/Phillips/Square Wall Twisters, (1) 3/16" Carbide Tipped Drill Bit, (1) 5/16" Magnetic Hex Bit
