

8" All Weather In-Ceiling Speaker

AWC280

SKU: 29903

Planning a new in-ceiling audio system in non-traditional rooms of your home? Then consider Monitor Audio's AWC280 in-ceiling speaker — part of the company's all-weather "AW" series that lets you enjoy clear, full-range sound in areas that are exposed to the elements. Use this speaker for a neat-looking (and great-sounding) custom installation in your bathroom, on your porch, or in other areas where "regular" speakers aren't suitable.

One of Monitor Audio's hallmark technologies is their "C-CAM" driver material. It's a ceramic-coated aluminum/magnesium alloy originally developed by the aerospace industry for jet engine components. It's super lightweight and strong, which allows the drivers to respond very quickly and precisely for accurate sound.

The AWC280's 8" woofer and 1" dome tweeter are both made from this material. The tweeter is even treated with an anodized layer of gold for smooth, extended high-frequency response.

Features

- IP55 certified for salt spray, UV stability, moisture resistance, vibration, and anti-corrosion
- The speaker back is completely encased in tough mineral-filled polymer to prevent dirt or moisture from getting in
- Ideal for music in a bathroom, porch, pool, or 120-volt marine audio system
- Ultra-rigid, lightweight C-CAM® (Ceramic-Coated Aluminum/Magnesium) driver material used to provide high efficiency and low distortion
- 8" C-CAM woofer for smooth midrange and tight bass response
- 1" gold dome C-CAM tweeter for detailed sound and extended high-frequency response
- Frequency response: 50-30,000 Hz
- Recommended amplifier power: 20-100 watts
- Sensitivity: 89 dB
- Impedance: 8 ohms
- Patented Tri-Grip® mounting system ensures maximum surface seal for better bass and midrange clarity
- Gold-plated push terminals with silicon covers to keep away moisture
- Stainless steel corrosion-resistant grille
