10" Digital Dual Drive Subwoofer

ADS10

SKU: 33580 UPC: 812348000000

Anybody can appreciate great bass. Everybody wants great bass. But big bass usually means big speakers, and *not* everybody wants those—or has the space for them. That's why we built the ADS10. It's small enough to stay out of sight—but big enough to deliver soul-stirring deep bass!

The ADS10 starts with a rugged, forward-firing 10" driver that delivers incredible punch. It finishes with a downward-firing 10" passive radiator that delivers intense rumble. Put them together, drive them with our 200-watt digital amp, and you get amazing bass from the deepest whumps of action-movie explosions to the tightest pops of funk basslines.

We give you all the crossover and level controls you need to mate the ADS10 with any home theater or stereo system. In seconds, the bottom end is dialed-in perfectly, and the thrilling nights of movie and music can get started!
