

Mini Programmable Timer

SA-026Q

SKU: 27512 UPC: 676544000000

The ENFORCER SA-026Q is a low-voltage miniature timer module which operates on 12~24 VAC/VDC. It can be used to modify the activation time of a momentary contact switch for 1~180 seconds via a field-adjustable VR (variable resistor) rotary knob. It is ideal for electrical door strikes or electromagnetic locks that do not have a built-in time delay function.

Features

- Adjustable timer from 1~180 seconds via an onboard potentiometer
- Compact size: 1-3/16"x2-3/16"x5/8" (30x55x16 mm)
- Operating voltage: 12~24 VAC/VDC
- Relay output: Form C (SPDT), via terminal block
- Contact rating: 3A@24VDC
- Built-in buzzer output: (100mA@24VDC)
- Current draw at 12VDC (max.):
 - Standby 5mA
 - Active 50mA
- Includes double-sided foam mounting tape
