X-Large Full Motion TV Wall Mount for 40" to 90" Panels

LDX690

SKU: 62595 UPC: 800153000000

The Kanto LDX690 is a UL-certified, full motion wall mount designed to give you full control over the position of your TV. This TV wall mount is suitable for 40 to 90-inch screens weighing up to 125 pounds and its dual-stud wall plate can be reliably mounted to brick, concrete, or wood-studs up to 24 inches apart. Extend your 40 – 90 inch TV wall mount up to 28 inches in order to pan and swivel it for off-center viewing, and tilt it 18° to reduce glare and improve line-of-sight. The Kanto LDX690 comes with a drill template for a quick and accurate installation, as well as plastic wall plate covers and cable management clips to ensure a clean, professional looking setup.

Features

- Heavy-duty articulating arms allow you to extend your TV 28" from the wall and swivel it 80° in either direction. Maintain a perfect viewing angle wherever you're seated.
- Achieve between +15° to -3° of tilt in order to reduce glare and improve line-of-sight when mounting your TV above eye-level. The tilt head can be easily tensioned to allow for on-the-fly adjustments or to lock your TV in place.
- Use the provided drill template to accurately mount your TV on brick, concrete or wood studs up to 24" apart. A labeled hardware bag is also included with all the lag bolts, anchors, washers and spacers you'll need for a custom fit installation. This makes installing this TV mount for studs 24 inches apart seamless.
- Designed to meet UL safety standards, the Kanto LDX690's high-grade steel construction and heavy-duty lag bolts easily support up to 125 lb. Mount a 40 – 90 inch TV to the wall without hesitation.
- In addition to providing a low-profile solution to displaying your TV, the LDX690 comes with plastic wall plate covers and cable management clips to keep your viewing area tidy.
