

Bronze C150 Center Channel Speaker

B6GC150W

SKU: 62651

This newest generation of Monitor's most affordable speaker series got a complete redesign for better audio performance and eye-catching looks. They come in four attractive vinyl finishes with attractive painted front baffles.

The C150's elegant sealed cabinet contains two 5-1/2" midbass drivers for punchy bass and smooth midrange. The cones are made of ultra-rigid, lightweight C-CAM® (Ceramic-Coated Aluminum/Magnesium) material that delivers high efficiency and low distortion. Damped Concentric Mode (DCM) technology helps the driver deliver more accurate response.

High frequencies get the superstar treatment as well. A 1" gold dome C-CAM tweeter with uniform dispersion (UD) waveguide sits in the center of the cabinet for crisp detail with extended high-frequency response.

Features

- 2-way design in sealed enclosure
- 1" gold dome C-CAM tweeter with uniform dispersion (UD) waveguide for detailed sound and extended high-frequency response
- Two 5-1/2" midbass drivers for punchy bass and smooth midrange
- Pureflow silver-plated oxygen-free copper internal cabling for high quality current transfer
- Recommended amplifier power: 30-120 watts
- Frequency response: 66-30,000 Hz (-6dB; in-room response)
- Sensitivity: 88 dB
- Impedance: 8 ohms
- Dual gold-plated binding post speaker terminals with bi-amp/bi-wire capability
- Acoustically transparent grille attaches magnetically
