

Red Mini Cross-Line Self-Leveling Laser Level, 35'

93MCLS

SKU: 152042

The Klein Tools Mini Cross-Line Laser Level is a high-performance laser leveling and alignment tool for professionals with over 18 hours of runtime. This level provides a reliable pendulum self-leveling system with red laser level lines. Equipped with a magnetic mounting bracket and overmold design that protects from water and dust, Klein's Mini Cross-Line Laser Level enables a multitude of alignment and layout applications.

Features

- Self-Leveling Red Laser Level has easy-to-read, horizontal and vertical lines, optimized for indoor lighting conditions with a working range of 35 feet (10.7 m)
- Projects horizontal and vertical lines to address various alignment tasks
- Compact and lightweight design is easy to use in tight areas and to store when not in use
- High precision laser project clean lines with accuracy of 3/16-Inch at 30 feet (9.1 m); auto out-of-level detection flashes lasers when no longer level
- Magnetic mounting bracket screws into integrated 1/4-Inch-20 tripod mount
- Over 18 hours of runtime provides enough laser power to ensure extended all day use
- Durable overmold design that is IP54 rated protects the laser level from water and dust
