IP-COM

8GE Cloud Managed Switch

G2208D

SKU: 158449   UPC: 885397000000

IP-COM cloud management switch provides a simpler, more intelligent, and secure remote management method that can be deployed across the entire network without command line debugging. Automatically recognize the camera, display the topology in a graphical way, simple and clear, making it easy to manage the network and monitor. VLAN configuration and management modification can be completed on mobile phones and computers, without the need for professional IT technicians to configure the command line.

Features

- Supports Cloud WEB platform management and APP management
- Visualize topology, Automatically generate
- Easy to use VLAN configuration
- Real time alarm for abnormal status
- Remote restart of the PoE port
- Real time viewing of port status
- Management In Hands, More Easily
