

MapMaster Mini Cable Tester - Clamshell

T109C

SKU: 42574 UPC: 849160000000

The MapMaster™ mini detects faults and locations of RJ45 network cables. Good terminations, causes of faults and locations of cables are displayed on an LCD display. A set of five mapping remotes is included for locating cables terminated in wall jacks or patch panels. A built-in tone generator with 4 different tone combinations can be used with a tone probe to detect where a cable is routed and the location of the end of the cable.

Features

- Detects Shorts, Opens, Miswires, Reversals, and Split-Pairs
- Built-in Tone Generator
- Map Multiple Locations
- Auto-off to Extend Battery Life
