

Radius 200 Center Channel Speaker - Black

R200BL

SKU: 4146 UPC: 5060030000000

Looking for crisp, focused center channel sound from a speaker that doesn't take up a lot of space? Monitor Audio's elegant Radius R200 should be on your radar. It makes a great, acoustically matched companion to other members of Monitor's Radius family of speakers, such as the R90 bookshelves or R270 towers.

The Radius R200 benefits from many of the technical advances, materials, and construction techniques found in Monitor's renowned, top-of-the-line Platinum series speakers. Both of its 4" woofer cones and 1" dome tweeter are made of a high-tech ceramic-coated aluminum/magnesium alloy.

This exceptionally stiff, lightweight material allows the drivers to respond swiftly and precisely to the audio signal for greater accuracy. The tweeter also gets an anodized coating of gold that helps ensure smooth, extended highs.

Instead of using conventional screws, Monitor mounts each driver firmly into the cabinet using a single bolt that threads into its backplate, then attaches to the back of the enclosure. This mechanically decouples the driver and front baffle to enhance clarity and resolution, while acting as rigid cross bracing for a more solid, non-resonant cabinet.

Features

- Frequency response: 60-35,000 Hz
- Sensitivity: 86 dB
- Recommended amplifier power: 40-150 watts
- Impedance: 6 ohms
- Ultra-rigid, lightweight C-CAM® (Ceramic-Coated Aluminum/Magnesium) cone material provides high efficiency and low distortion
- 1" C-CAM gold dome tweeter for detailed sound and extended high-frequency response
- Dual 4" C-CAM mid/bass drivers for clear midrange and punchy bass
- Bass-reflex (ported) design with HiVe® II technology for reduced turbulence and higher velocity airflow
- Single bolt-through driver attachment provides mechanical decoupling and increased cabinet rigidity for greater clarity and resolution
- Five-way binding post speaker terminals
