EZ Essentials+ Kit

EZLOSECURE3-1+TS

SKU: 147680 UPC: 850011000000

Build a versatile home security and automation system with one of the most powerful smart home and security controllers in the industry and access to a reliable security platform with the EZ Essentials+ Kit. This security and automation kit includes the Ezlo Secure Smart Security Controller, an Ezlo 10" Touchscreen, a 2GIG PIR Motion Sensor, and three (3) 2GIG Thin Door/Window Sensors. The Ezlo Secure is one of the most powerful automation and security system controllers available, capable of supporting thousands of Z-Wave, Zigbee, RF 345/433 MHz, and Wi-Fi devices via mobile app, web platform, or voice control. The Ezlo 10" Touchscreen is a 10" touchscreen controller with the Ezlo Protect app pre-installed for easy and convenient access to your smart system. The 2GIG Wireless Passive Infrared Motion Detector senses movement within a 30-foot long by 50-foot wide area view and ignores movement from small to medium-sized animals weighing up to 55 pounds. The 2GIG Wireless Thin Door/Window Contact monitors the status of any open/close object, including a door, window, cabinet, drawer, etc. Through the capabilities of the Ezlo Secure Security Controller, the Ezlo Secure 3-in1 Touchscreen Kit ensures your smart home or security network is always online and performing optimally.

Features

- Security and automation kit includes Ezlo Secure controller, Ezlo 10" Touchscreen, 3 door/window sensors, and 1 Pet Immune motion detector
- Ezlo Secure commands up to 4000 Z-Wave 700, Zigbee 3.0, RF 345 and 433 MHz, and Wi-Fi connected devices including lights, thermostats, door locks, ONVIF cameras, sensors and more
- Compatible with up to 27,000 Wi-Fi devices associated with Amazon Alexa or Google Assistant using Ezlo VOI
- Ezlo VOI platform consolidates separate voice command systems and communication protocols under the Ezlo Protect app
- EzloCast feature enables instant and simultaneous control over groups of devices
- Ezlo Secure 4G LTE backup keeps you online if the internet connection is lost (with Ezlo Protect Security Platform only)
- Build custom automation scenes with MiOS based on your preferences, schedule, and needs for individual or grouped devices
- Local control offers ultra-fast responsiveness and keeps your system off the cloud
- 10" Touchscreen includes Ezlo Protect app pre-installed for convenient control over Ezlo system
- Thin Contact Sensor fit into small spaces and monitors open/close status of an object
- PIR Motion Detector reports movement within 30(D) x 50(W) foot area and ignores animals up to 55 pounds
- Z-Wave Smart Start technology pairs new devices quickly and S2 framework ensures enhanced security
- Z-Wave 700 and Z-Wave LR software provide increased power, longer range, faster transmissions, and improved security
- Receive notifications and manage devices on your iOS or Android phone through the Ezlo Protect app
- Compatible with Ezlo Protect Security Platform for optional cloud storage, central station monitoring, and 4G LTE backup connectivity
