

Double-Door Electromagnetic Lock, Bond Sensor, Status LED, 1200-lb

E-941DB-1K2P

SKU: 139492

The E-941Dx series of electromagnetic locks is the ideal way to secure a door against unauthorized entry. When power is applied to the electromagnetic lock, it creates an extremely strong magnetic field. The electromagnet is strongly attracted to the steel armature plate which is mounted on the secured door. Once the electromagnet is deactivated, the secured door will function normally without any residual magnetism.

Features

- 1,200-lb (545kg) Holding force per door
- No residual magnetism
- MOV Surge protection
- Built-in status LED shows locked/unlocked status
- Built-in bond sensors with 3A@12VDC dry relay output for monitoring door status
- Anodized aluminum housing with black finish
- Adjustable mounting bracket
- Complete mounting hardware for typical installations
- Additional brackets available for easy mounting or atypical situations
- Detachable faceplate for easy access to wiring
- 12/24VDC Selectable
- Multiple UL listings
 - UL294 Access Control System Units – USA
 - UL10C Positive Pressure Fire Test – USA
 - UL10B Fire Test of Door Assemblies – USA
