

Acoustic Ceiling Tile with Reveal Edge - 2 x 2'

P211 2424 00

SKU: 156895 UPC: 676101000000

Primacoustics STRATOTILE Acoustic Ceiling Tile delivers exceptional sound absorption for recording applications and in offices, commercial retail stores, or anywhere wall treatment can't be applied. The tiles feature the same sound absorption characteristics as the Broadway Series panels.

The tile is constructed from 6 lb per cubic foot rigid fiber glass, and encapsulated with a micro-mesh and fiber-glass facing. Each tile installs into ceiling tile frames that accommodate 2 x 2' (60.96 x 60.96cm) tiles. These tiles feature a "reveal" edge to create a beveled (revealed) look when mounted on the ceiling tile frame.

Features
