## OE6 One 6.5" Indoor / Outdoor Speaker - White

ASM80611

SKU: 66805    UPC: 664254000000

Step into great sound in a smaller footprint. Not to be underestimated, the OE6 One is a great solution for your weekend getaway when it's not your primary outdoor living area.

The Outdoor Elements series includes eight different models to address a multiple of different exterior applications. Depending on the need, you can choose from speakers that offer five-inch, six-inch or even eight-inch woofers. Loaded into ported enclosures to dramatically enhance low-frequency response, these woofers provide deep full bass to complement any type of music.

The mid-range and high frequencies are produced using advanced cone or dome drivers depending on the model. All drivers are made of space-age polymers, injection molded graphite, or aluminum and are selected for sonic purity and dynamic performance. All of our Elements line of speakers are available in black or white.

### Features

- Loaded into ported enclosures to dramatically enhance low frequency response
- Provides deep full bass to compliment any type of music
- Produces mid-range and high frequencies using advanced cone or dome drivers
- All drivers are made of space-age polymers, injection molded graphite or aluminum
