

Red High-Security Red Cloud Node SE - Server Edition

RSVR

SKU: 140624 UPC: 850038472061

The Cloud Node is the main system panel and is the gateway to the pdk io cloud platform. Each site requires one Cloud Node with an Internet connection. The Cloud Node then communicates with all local door controllers while storing all data on-site in case of an internet outage. With the PDK API, the Cloud Node becomes a fully integrated access control solution.

Specifically designed and configured with IT value-added resellers in mind. Simply slide the Red Cloud Node SE into any standard 19' server rack and connect it to the network. The Red Cloud Node SE automatically discovers all other door controllers, monitors battery health, and provides anytime access to the intuitive pdk io cloud software.

Features

- ProdataKey Red™ products lead the industry in secure communication protocols. This includes OSDP, mobile, and encrypted credential communication.
- Equipped with a fully-supervised power circuit that monitors input, output, battery voltage, and overall controller health.
- All PDK Red devices were designed to be plug n' play. That means they're easy to install right out of the box. It's simple to add any device no matter how large the job is.
- The Red Cloud Node SE automatically discovers other controllers throughout the system, making installations convenient and effortless.
- Experience future-proof access control that's always secure and up-to-date when new features and security enhancements become available.
- Whether you need two doors or a thousand, the Red Cloud Node SE gives you the flexibility to add more doors to your anytime, anywhere, on any device.
