

SSF-PULLEYEM Pulling Eye Kit for 2+ Fiber

SSF-PULLEYEM

SKU: 161383

Safely install multi-fiber cables assemblies with the Cleerline SSF-PULLEYEM Pulling Eye Kit. Use the SSF-PULLEYEM with assemblies including multiple fibers, such as Micro Distribution or Rugged Micro Distribution assemblies. It can also be utilized with tactical cables or larger diameter cables. This kit incorporates PVC-jacketed aramid yarns as the strength member. The pulling eye's clip rotates, helping to decrease twisting. The SSF-PULLEYEM includes an aluminum locking nut, allowing the cable's strength member to be attached to the pulling eye. This helps ensure only the strongest part of the cable is under tension. The SSF-PULLEYEM's pull sock is a durable plastic mesh, which keeps all connectors secure.

Features

- Used with multi-fiber assemblies (Micro Distribution, Rugged Micro Distribution, and Tactical)
- Protects cable assemblies for installations in wall or in conduit
- Easy attachment
