RIK6XLW

SKU: 24000 UPC: 00863493884

Important Notice: This item is final sale and non-returnable.

The RIK6XLW 6" In-Wall Rough-In-Kit (Pair) from Jamo is a plastic pre-construction kit that allows you to mount speakers on studs before drywall is cut and installed. This unit will reduce the amount of time to cut holes in drywall and to place speaker cable. The kit features thin removable wings that allow you to mount your product with virtually no rise in drywall depth.
